IFIM College, Affiliated to Bangalore University

Currently in final year of Bachelor of Computer Applications

SKILLS

Languages: HTML, CSS, JavaScript, Python, Java,

Technologies: Bootstap, Git, Github, MySQL, PHP

EXPERIENCE/PROJECTS

Freelance Front-End developer   Feb 202 1 - April 2021

Mt.Zion Ministries Int.

- Built a responsive church website front-end for Mt.Zion Ministries which is located in Uganda, East Africa.
- The website is actively working and this was a personal project that I did alone in about a month.
- I added an audio feature using JavaScript and JQuery where all audio sermons/preachings can be uploaded and listened to by different people in remote areas.
- I also added a video feature on the site where anyone can watch videos of the sermon right on the site with out switching to Youtube.

Web developer   July 2021 - September 2021

My Captain, Online - Web development workshop

- Built an ecommerce website front end
- I made it responsive on all screen sizes using media queries and I added different buttons on the products like the like, wish-list, add-to-cart, buttons with animations.

Full Stack web developer   November 2021- March 2022

Final year minor project

- Led a team of 3 to build both the front-end and back-end of an ecommerce website.
- Built the front- end using HTML, CSS, JavaScript, Bootstrap, JQuery and the back-end was mainly developed using PHP
- Added a search engine that allowed the user to search and easily find the desired product
- Developed codes using common testing practices and verified the functionality of the user interfaces, back-end processing, connectivity and database interactions
- Used XAMP control panel for the connection control between the back-end and front-end during the development of the website.

CERTIFICATES

- Certificate in Web Development
- Introduction to cloud computing using HTML,CSS, and JavaScript -IBM
